EVALUATED BY J. L. Jacobs		DATE 09/11/2008

INSTRUCTIONS: Indicate items reviewed by placing a check in the "Evaluated" box and/or the "Action Required" box. If this form is used as a Correction Report, the "Correction" box should be initialed and dated as deficiencies are corrected. Answer individual items with "yes" or "no" answers, or fill in the blanks as indicated. If additional comments are necessary, the information can be placed on the CHP 454, Area Management Evaluation Supplement. The Supplement should include significant findings, accomplishments or corrective actions, unresolved items, problems or progress, and the evaluator's overall impressions. This form can be completed in pen or pencil, and the Supplement can be handwritten if desired.

AREA MANAGEMENT EVALUATION SUPPLEMENT

CHP 454 (Rev. 5-06) OPI 009

SUBJECT: Area Management Evaluation, Communications Systems, Chapter 14

DATE: 04/10/2008

SECTIONS		COMMENTS
1. Telephone	1.b.2	There are no plans to upgrade the telephone system because it was upgraded two (2) years ago. All calls in the Communications Center are routed to call takers through an Automatic Call Distributing system which is built into the computer program controlling the telephone system.
	1.f	There are no calling cards assigned to the supervisors.
2. Management Information System		All employees associated with the Communications Center are trained and given guidelines for the proper use and misuse of the Information Systems, to and including signing a CHP101 annually during their evaluation process. Additionally, they must be recertified using the DOJ requirements biannually.
3. Radio - Nondispatch Office		This section is N/A to the Communications Center operation/evaluation. Fresno Area does not have a base station unit.
4. Radio - Dispatch Office	4.a.(1)	Supervision is always available to the PSDs, whether it be a dispatch supervisor or a field supervisor.
	4.a.(5)	There are a couple of employees being tracked for attendance habits and if a pattern develops they will be disciplined appropriately.
	4.b	All new communication center employees get specialized training at the CHP Academy and at the local level upon their return.
	4.c.(1)	Our radio frequencies are overwhelmed by the growth of the Central Valley. Fresno Area on behalf of the Communications Center has submitted a request to split the Pink Radio Frequency to alleviate the overload and to address the more important issue of Officer Safety. Also the CHPEERS program will enhance the current radio range which will benefit Officer Safety.
	4.f.(3)	PSDs do not officially do the signal 10-11, but they do identify the frequency with every broadcast.
	4.g.(2)	The overall quality of the dispatch operation is excellent, as evidenced by a letter sent to the Command commending the employees for a 98.15 percent service level.
	4.g.(3)	FCCs allocated positions is sufficient to meet operational needs. There are several vacancies which overtime fills. When the positions are filled by trained personnel overtime will diminish significantly.
	4.h.(1)	The equipment room is being used for storing toner cartridges and PCs because the Area Office has run out of room for virtually everything.
	4.h.(3)	Cabling in the radio and equipment rooms are not maintained in protective conduit because of the layout of the building and the lack of false floor. A new building will enable us to ensure they are organized properly at installation. The same will apply for the Communications Center.

1. TELEPHONE

- a. Is the Area's telephone system efficient and effective? ☒ Yes ☐ No
- (1) Are telephone locations beneficial to the operation? ☒ Yes ☐ No
- (2) Are there a sufficient number of lines? ☒ Yes ☐ No
- (3) Has any planning been undertaken to address replacement or upgrading? ☒ Yes ☐ No
- b. Is call answering efficient and effective? ☒ Yes ☐ No
- (1) Who is responsible for answering calls? All PSDs handle emergency 911 calls that come into the dispatch center. Business office calls are handled by the front desk officer.
- (2) Who answers additional incoming calls to ensure prompt public service? Business calls roll back to the clerical office after 5 rings.
- (a) How is the need for answering additional incoming calls recognized? Clerical telephones will ring.
- (3) How are calls handled after business hours? The telephone system is placed on a recording device which advises of the business office's hours. Emergency calls are directed to call 911.
- (a) Do tape recorded messages contain sufficient information to give guidance to the public? ☒ Yes ☐ No
- (4) Are callers greeted properly? ☒ Yes ☐ No
- c. Are road and weather conditions provided? ☒ Yes ☐ No
- (1) Is the employee who provides road and weather information given up-to-date information? ☒ Yes ☐ No
- (a) If a tape-recorded message is issued, is it updated with the most current information available? ☒ Yes ☐ No
- (2) Are alternative sources, such as the Caltrans Highway Information Network "800" number and weather bureau telephone number, provided? ☒ Yes ☐ No
- d. Does the commander require long distance calls to be logged? ☐ Yes ☒ No
- e. Are Operational Dial Telephone (ODT), or "green phone" lines of sufficient quantity? ☒ Yes ☐ No

AREA MANAGEMENT EVALUATION SUPPLEMENT

CHP 454 (Rev. 5-06) OPI 009

SUBJECT: Communications Systems Evaluation

DATE: 09/09/2008

SECTIONS	COMMENTS
4. RADIO - DISPATCH OFFICE	
Section (a)(3), page 4	Due to an increased workload, the communication center minimum staffing formula needs to be changed. However, due to staffing shortages, these changes have not been possible. Currently Merced Communications Center has 3 trainees in one-on-one training and seven vacant positions. As trainees complete their training and are released to work independently , minimum priorities will be raised. Action item: Continue active recruitment, hiring and training to fill all vacant positions. (on-going)
Section (a)(5), page 4	Employee sick leave usage is continually monitored. Possible sick leave abuse patterns are monitored and corrective action is taken as necessary.
Section (c)(1)(b), page 5	Merced Communications Center runs two main radio frequencies, the Yellow and the Orange. As has been previously documented, both radios are considered "overwhelmed" by DGS standards. The radios have been slated to be split into four frequencies in 2009. Action item: Continue to monitor the status of the Orange and Yellow radio split project.
5. RADIO DISPATCH - EMERGENCY INCIDENT OPS.	
Section (f)(2)(a), page 7	Special certifications, POST classes, and in-service training have, in the past, not been documented on the dispatcher's CHP270, Service Record. Training records need to be kept current and maintained. Action item: CHP270 training records shall be reviewed during each employee's annual evaluation and shall be updated as needed.
